

RETENTION RADAR

Coordinator Briefing

Your guide to the weekly action report — what each section means, how to use it, and what to do.

NOTE: Your owner chose which sections appear in your report. Not every section below may be present in yours — ask your owner if something here seems to be missing.

What's in your report

● Summary bar

Four numbers at the top: active members, urgent outreach count, sliding count, weekly revenue. Your quick pulse check before you start calling.

● Briefing

A one-paragraph summary of the week — who needs attention, any new members, welcome-backs, revenue vs target. Read this first.

● Owner escalations

Notes from your owner — members who need a personal call from them, data issues to be aware of, or anything that shouldn't come from you.

● Financial

Revenue split between stable (memberships) and discretionary (packs, drop-ins, fees). Breakeven tracker. This is for context — not for sharing with members.

● New members

Members who joined this week. Welcome call script included. Reach out within 48 hours.

● Welcome backs

Members who just came off a suspension hold. Warm check-in only — no pressure, just glad to have them back.

● Urgent outreach

Members who are ghosting (14+ days absent) or barely attending vs their own average. Grouped by membership type. Contact today.

● Sliding

Members whose attendance has dropped vs their own 6-month average. Not yet urgent but heading that way. Call this week.

● Watch list

Members with low or declining attendance — not critical yet. Monitor and call if they move into sliding or urgent next week.

● Suspended

Members currently on hold. No outreach needed. Dates show when they return — they'll appear in Welcome Backs when they do.

● Thriving

The standout cases. A member lands here either by growing noticeably vs their own average, or by quietly holding strong, steady attendance month after month — both are worth recognizing. Usually no action needed; some studios use these for a quick recognition message, or a review/referral ask. If your owner has turned this on, you may see a script and contact button here too.

● Climbing

A lighter touch than Thriving — members with a real but modest uptick in attendance (roughly 10-20% vs their own average). Shown just below Thriving cards, in the same section. Informational only — these never get a script or contact button, even if your owner turned that on for Thriving.

Tick boxes

After each call, tap one of the buttons on the member's card.

● Contacted

You called or messaged. Conversation happened.

● Cancelled

Member has cancelled their membership.

● On hold

Come back to this member. Not ready to action yet.

Ticks save automatically

Your ticks are saved to this device the moment you tap them. Close the report, come back tomorrow — everything is exactly where you left it.

One device only. Always open the report on the same phone or tablet. Ticks do not sync between devices — if you switch devices, your progress resets.

Each member card shows

- Name + membership tier — What they're paying for
- Days since last visit — Red = 14+ days (ghost territory)
- Visits this month — vs their personal monthly average
- % vs their own average — How they're tracking vs themselves
- Context note — What the numbers mean for their tier
- Outreach script — What to say — adapt to your natural voice
- Call button — Tap to dial directly from your phone

Outreach order

WHEN	SECTION	WHY
Today	Urgent (red)	Ghosts + barely attending
This week	Sliding (amber)	Declining vs personal average
This week	Welcome backs	Members off hold — warm check-in
This week	New members	Joined this week — welcome call
Monitor	Watch list	Keep an eye — may become sliding
No rush	Thriving	Good news — not a priority task
No rush	Climbing	Modest uptick — a quiet nod, nothing to do

Members not on the list

If a member isn't on any list they're attending well. No outreach needed — the system only shows members who need attention or recognition.

If a member should be there but isn't, let your owner know — it may be a data issue with the weekly reports.
